About FirstVITE

FirstVITE E-Learning Pvt Ltd is a globally recognised edtech platform offering career-driven certification programs to fast-track your professional growth. Our hands-on, industry-relevant training spans IT, management, finance, healthcare, and more—aligning with today's dynamic job market needs.

Our **Android App Development** course delivers in-depth training on building robust, user-friendly mobile applications. Learners explore Java, Kotlin, UI/UX design, Android Studio, and API integration through real-world projects—empowering them to launch successful careers in mobile app development.

Our Goals

Creating Value Comes First For Us

"Our mission is to empower individuals and businesses worldwide by delivering transformative Android app development education—driven by expert guidance, modern tools, and practical skills to succeed in the mobile-first world."

Why Android App Development Certification Training Course?

01. What is Android Development and Why Learn It?

Android development lets you create mobile apps for billions of devices worldwide. Learning it gives you the power to build native applications using Java, Kotlin, and Android Studio—perfect for real-world, mobile-first careers.

02. Why is Android So Popular Among Developers?

Android dominates the global mobile OS market. Key reasons include:

- Open-source platform with vast customization
- Massive global user base
- Rich libraries and SDKs
- Google Play Store reach
- Constant updates and innovations

This course focuses on hands-on development for real Android devices.

03. What is XML and How is it Used in Android?

XML (Extensible Markup Language) is used to design UI layouts in Android apps. It helps define screen elements like buttons, text fields, and images, making your app's visual structure easy to build and manage.

04. How Are Activities and Fragments Used in Android?

Activities are individual screens in your app, while Fragments are reusable UI components. Together, they let you create dynamic, modular apps that work across different device sizes and configurations.

05. How Does Android Optimize App Performance?

Android ensures performance using:

- Efficient memory and lifecycle management
- Background processing with Work Manager & Services
- Optimized layouts with Constraint Layout
- Tools like Profiler, Logcat, and Lint for debugging

Benefits of Mobile App Development

India / Job / Android Software Developer

Average Android Software Developer Salary in India

₹363,395

Avg. Salary [Show Hourly Rate](#)

₹30,791
BONUS ₹5,189

Career Scope

Career Benefits

Whom Is It For?

1. Hands-on experience with Android Studio
2. UI design with XML
3. Strong grasp of OOP principles
4. Proficiency in Java or Kotlin

Program Outcomes

- **Master Android Fundamentals** – Learn Activities, Fragments, Intents, and UI components.
- **Build Responsive Android UIs** – Design fast, dynamic, and user-friendly mobile interfaces with XML and Jetpack Compose.
- **Work with Android Architecture Components** – Use View Model, Live Data, and Navigation for efficient app structure.
- **Integrate APIs** – Fetch and display real-time data using Retrofit and RESTful APIs.
- **Manage App State** – Implement data handling with Room database and Data Store.
- **Prepare for Production** – Write clean, reusable, and optimized Kotlin/Java code for scalable Android apps.

Qualifications for Eligibility

Basic computer knowledge and logical thinking with a strong interest in mobile app development and Java programming.

**Android App
Development
Software Tools**

FirstVITE E-Learning Pvt Ltd

Internship in Top MNCs

Internship in Top Global Companies

Get work experience with virtual programs from top global companies such as:

Certificate of experience from top global companies

At your own speed and in your own time, acquire extremely elevating skills.

Make connections between students and prestigious companies by simulating their work.

Obtain a genuine professional edge by working with Fortune 500 companies.

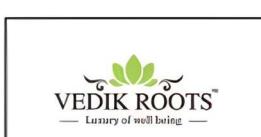

Learn essential skills and get a taste of what actual job looks like. Most notably, some of the world's top pupils
